DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-7 and 10-14 allowed over prior art.

The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggests a plurality of smart cameras, each smart camera is generating a flaw image data and a flaw location by a prioritizing analyzer and a blob detector, and the smart cameras are connected to host computer for receiving and displaying the flaw image data and the flaw location data as claimed in independent claim 1.

None of the prior art teaches or suggests a method of web inspection of a web having steps of providing at least one smart camera which is generating a flaw image data and flaw location data by prioritizing data process and location generating process, and transmitting the flaw image data and flaw location data over an Ethernet to a host computer to display the flaw image data and flaw location data on the host computer as claimed in independent claim 7.

None of the prior art teaches or suggests at least one smart camera having at least one multi-group threshold for grouping a first and second pixel representations to generate at least two data streams of potential flaw, and a priority logic circuit for prioritizing at least two data stream of potential flaws to generate a digitized video data stream of the flaw as claimed in independent claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
